

## Our Solutions

Our solutions enable:

- **eProcurement and eInvoicing** - we provide modules for buying organisations to manage their procurement processes including the requisition cycle, goods receipting, eInvoicing, payments and contract management.
- **Catalogue Management** for buyers and suppliers to manage, publish and search for catalogue and content information.
- **Trading Management** - exchange and manage a variety of electronic procurement and supply chain documents with buyers and suppliers, for example, Request for Quote (RFQ), Purchase Order (PO), Invoice, Advance Shipping Notice (ASN) etc.
- **Resource Management** - modules for buyers and suppliers to track demand and manage supply, logistics and distribution of stock.
- **Management Information** - includes pre-built and custom reports in an easy-to-use interface to provide purchasing teams with insightful data on spending patterns.
