

Trading Management

The ProcServe Trading Management solution helps organisations to answer the following questions:

- Have you invested in eProcurement technology but not achieved a return on investment?
- Have your suppliers resisted investing time and resources to connect to your eProcurement system?
- Do you still receive a high proportion of paper invoices?
- Is the lack of good quality catalogue data hampering adoption by your users?

This solution can help overcome these issues and unblock the potential of eProcurement.

Features

- **One-to-many integration points** - connect to ProcServe once to trade with all of your eEnabled trading partners.
 - Integrate with any buyer procurement, ERP or finance system.
 - Integrate with a variety of other buyer systems including materials management, asset management and pharmacy systems.
- **Fixed cost subscription fees** - unlimited usage.
- **Market proven and tested** - used as the core eMarketplace platform for UK Government.
- **Flexible interoperability** - use only the components you need to work alongside your existing infrastructure. The Trading Management solution allows you to send and receive electronic documents directly from your own back office systems such as sales order processing, ERP, warehouse management, track and trace or finance systems.
- **Hosted Service** - all components are hosted by ProcServe within a secure 24x7 data centre.

The ProcServe Trading Management solution is a package of technologies and services designed to help you trade more efficiently with your suppliers. This solution will save you money by increasing the level of automation within your P2P process by increasing control whilst reducing administration.
