

## About Us

**ProcServe** provides world leading eCommerce Solutions and Services to organisations who wish to improve the efficiency of their internal or external supply chains, gain control of costs and resources, or implement procurement shared services to enable collaboration. Our key offering is the 'ProcServe Commerce Hub', which enables buyers and suppliers to get connected and transact easily and efficiently.

By connecting to the ProcServe Commerce Hub, buyers and suppliers automatically belong to the ProcServe Commerce Network which provides the ability to join and share procurement information with similar organisations. This provides the potential to create 'buying hubs' or 'communities' to aggregate purchasing power and lower the costs of buying day-to-day goods and services.
